STEEL INDUSTRY PRODUCTS		TARIFF	
KEYWORDS	DESCRIPTION / COMMENTS	SUBDIVISIONS	CODES
BAR	<p>Long products in straight lengths often described by cross section shape e.g. ROUND, SQUARE, HEXAGON, OCTAGON. The term also covers ROD which has been decoiled, straightened and cut into lengths.</p> <p>In the Tariff, codes for bars also cover certain special sections of solid cross section shape such as ovals, triangles and half rounds.</p> <p>FLATS (flat bars) and REINFORCING BARS are classified within the main headings for 'bars and rods' in the Tariff. In this Guide they are described under their own keywords.</p> <p>It is essential to determine the chemical composition of bar products before considering the codes because the criteria for subdivision in the Tariff are very different for each quality class.</p> <p>From the beginning of 1994 the classification of STAINLESS bars in the Tariff was changed to show more detail for ROUNDS. At the same time separate codes for STAINLESS FLATS were withdrawn; these are now included among 'other sizes and cross-sections'.</p> <p>From the beginning of 1996 changes to the Harmonised System resulted in general renumbering of codes for NON ALLOY and STAINLESS BARS.</p>	<pre> NON ALLOY ├── FORGED │   └── 7214 10 00 ├── HOT ROLLED │   ├── ROUNDS - 80mm or over │   │   ├── Carbon content up to 0.25% │   │   │   └── 7214 99 31 │   │   └── 0.25% or over │   │       └── 7214 99 71 │   ├── - Less than 80mm │   │   ├── Carbon content up to 0.25% │   │   │   └── 7214 99 39 │   │   └── 0.25% or over │   │       └── 7214 99 79 │   └── OTHER CROSS SECTIONS │       ├── Carbon content up to 0.25% │       │   └── 7214 99 50 │       └── 0.25% or over │           └── 7214 99 95 ├── COLD FINISHED │   ├── Carbon content up to 0.25% │   │   └── 7215 50 19 │   └── 0.25% or over │       └── 7215 50 80 ├── Further worked │   └── 7215 90 00 ├── FREE CUTTING │   ├── HOT ROLLED │   │   └── 7214 30 00 │   └── COLD FINISHED │       └── 7215 10 00 └── STAINLESS     ├── HOT ROLLED     │   ├── ROUNDS - 80mm or over in diameter     │   │   ├── Nickel content 2.5% or over     │   │   │   └── 7222 11 11     │   │   └── up to 2.5%     │   │       └── 7222 11 19     │   ├── - Less than 80mm in diameter     │   │   ├── Nickel content 2.5% or over     │   │   │   └── 7222 11 81     │   │   └── up to 2.5%     │   │       └── 7222 11 89     └── Other sizes and cross sections         ├── Nickel content 2.5% or over         │   └── 7222 19 10         └── up to 2.5%             └── 7222 19 90 </pre>
